

# Cleo Healthcare Solutions for Care Providers

**Streamline and secure data exchange, transfer large files with ease, and meet evolving compliance standards**

Healthcare providers are exchanging large amounts of data that must comply with various regulations, including HIPAA, Meaningful Use, and the Final Omnibus Rule. In addition, they risk millions in dollars in fines for breaches that expose Patient Health Information (PHI) or Personally Identifiable Information (PII). And often they are exchanging this information across various systems, applications, and processes, which leave them vulnerable to data breaches and other risk.

Whether you need secure file sharing for discharge care instructions to patients, secure file transfer for supporting documentation such as MRI image files and doctors' notes to payers, or secure faxing/notifications with desktop MFT integration, Cleo provides the solution.

## About Cleo

Companies need to move data both within their enterprise and beyond. They want to view data insights and act with informed decisions.

Cleo makes it easy! With more than 35 years of experience and more than 100,000 proven and tested installations worldwide, Cleo offers enterprise integration software solutions that are exceptionally easy to install and use. Cleo has solutions for enterprise data integration, enterprise managed file transfer, secure file sharing, and interactive engagement.

## How Cleo Healthcare Solutions Benefit Providers

Problem	Key Capabilities Needed
Compliance	Improve compliance with HIPAA, HITECH, and PHI regulations
Single Solution	Support fax, file share, and secure data exchange via a single platform
Auditability	Gain a complete audit trail of all your file transfer activity
Tracking and Workflows	Provide life cycle visibility of all transactions, including SLA/KPI management

## Solutions

Cleo Solutions	Description
<b>Cleo Integrated Collaboration Gateway</b>	Enables secure communication with patients, doctors, labs, HIEs, and payers using many industry standards to ensure compliance with HITECH Act. It also protects and secures PHI data by providing strong encryption for data in transit and at rest, ensuring breaches never happen, while also providing full auditability of changes and all transactions to proactively alert on intentional or unintentional precursors to breach. This solution also provides life cycle visibility of all transactions, SLA/KPI management to ensure prompt service for all business units.
<b>Cleo Secure File Sharing Platform</b>	This collaboration portal enables efficient data transfers during enrollment, authorization supporting documents, or claims supporting documents. It also provides patients with an electronic copy of their health information (test results, medication lists, discharge summary, etc.) and large file transfers. The portal provides full auditability and data safeguards to ensure HIPAA compliance.
<b>Cleo Multimodal Interactive Engagement</b>	Enables fax, messaging, text notifications for patient appointments and other reminders, document management, full audit trail and confirmation, and security/regulatory compliance.

### Cleo Healthcare Solutions

Throughout the healthcare industry, the need for privacy, security, and data governance is dramatically increasing as government, industry, and corporate compliance mandates continue to grow. Cleo solutions help you move your data more securely and reliably so that it can be viewed by the right people who can quickly and confidently act on it. Improve compliance and efficiencies by consolidating outmoded and risky integration solutions, and automating business workflows and communications. Let Cleo help you lower your risk and improve your efficiencies with Cleo Healthcare Solutions.
